Dekospan

Product Description

Dekospan is a direct surfacing, of for example a particleboard V 20 E 1, with pure aluminium. The aluminium surface is permanently protected by means of a heat cured layer on the basis of an epoxide resin.

In the manufacturing process of *dekospan* a slight unevenness in some of the aluminium surfaced particle boards and the slight indentations are at the present stand of the technique and are normal and unavoidable. Slight colour variations are also possible which are not detrimental to the overall appearance. These differences in surface and colour are therefore not indicator of a product of inferior or lower quality but show that you have here a genuine metal surface and not an imitation.

Products available

Directly surfaced *dekospan* is available in form of boards.

Standard dimensions: 3,650 x 1.250 x 10mm
 3.650 x 1.250 x 13mm
 3.650 x 1.250 x 16mm
 3.650 x 1.250 x 19mm

Other sizes are available upon request.

Application and Processing

Dekospan with genuine aluminium surfaces are intended mainly for use as vertical surfaces. It can, however, also be used as horizontal surfaces which are not exposed to heavy wear.

Typical applications are: Home furniture, skirting boards, wall cladding, ceiling cladding, and backside of cupboards.

Cleaning and Maintenance

The surface of a *dekospan* boards is best cleaned by using a clean cloth, or a soft sponger using soap and plenty of water or a glass cleaner. The surface can then be wiped dry using a soft cloth or similar.

Abrasive cleaners, acid or alkalise should never be used.

Waste Disposal

Dekospan waste can be burnt in officially accepted incinerators. *Dekospan* waste can also be disposed of in landfills in accordance with local regulations.

Dekospan waste is classified by German law under the OECD-code GL 010 ("green List") and under Nr. 03 0103 of the European Waste Version and are considered household waste and can be disposed as such.

Should you have any further questions, please do not hesitate to contact our service department. If you need samples you can order these in the form of chains, A5 or A4 from Dekodur®.
